*Alameda County -- Population
Housing -- California -- Alameda Co.*

**ALAMEDA COUNTY POPULATION AND HOUSING ESTIMATES
BY CENSUS TRACT JANUARY 1, 1978
AND COMPARISONS WITH APRIL 1, 1970**

The attached table containing data by census tract is the first output of Alameda County Planning Department's population estimating model.

The total population, total number of housing units, and average household size is given for each census tract in Alameda County. Also, the 1970 data is given for comparison with the January 1, 1978 estimates. The figures for each census tract are for the tract total regardless of whether or not the census tract is split by a jurisdictional boundary. Therefore, it is not possible to aggregate census tracts to city totals in many areas.

A jurisdictional summary of these estimates is available in the report titled Estimates of Population and Housing for Alameda County, Cities, and Places as of January 1, 1978 published by Alameda County Planning Department August, 1978.

The census tract estimates were developed by updating the housing stock from the nearest base, either the 1970 U.S. Census or a latter special census or from building data. This was then adjusted for the number of occupied units using residential electric meter data. Occupied units were multiplied by household size which was taken from the base period and adjusted on the basis of changes in school enrollment. A more detailed explanation of the methodology can be found in the August, 1978 report referred to above.
